REV 10/04

ARK:jsg040202/4781012DIV.PAMD

Line By Line Specification:

The present application is a divisional application of U.S. Serial No. 09/339,545 filed June 24, 1999 which claims the priority benefits of Danish Patent Application Serial No. PA1998/00821 filed June 24, 1998. The present invention relates to a method of detecting a specific antibody in a liquid sample.

Full Text Amendment:

The present application is a divisional application of U.S. Serial No. 09/339,545 filed June 24, 1999 which claims the priority benefits of Danish Patent Application Serial No. PA1998/00821 filed June 24, 1998. The present invention relates to a method of detecting a specific antibody in a liquid sample.

which claims benefit of Provisional App 60/090,855 filed June 25, 1998,

Please replace the second full paragraph 2 on page 3 with the following new paragraph 2.

Line By Line Amendment:

This first object is achieved with the method of the invention, [a first aspect of which is defined in claims 1-6,] the essential new feature of the invention being that an additional sequence of separation and washing of the intermediate solid phase complex consisting of particle with reactant antibody and sample antibody is carried out prior to addition of ligand.

Full Text Amendment:

This first object is achieved with the method of the invention, the essential new feature of the invention being that an additional sequence of separation and washing of the intermediate solid phase complex consisting of particle with reactant antibody and sample antibody is carried out prior to addition of ligand.
